

# Process & Decision Documentation

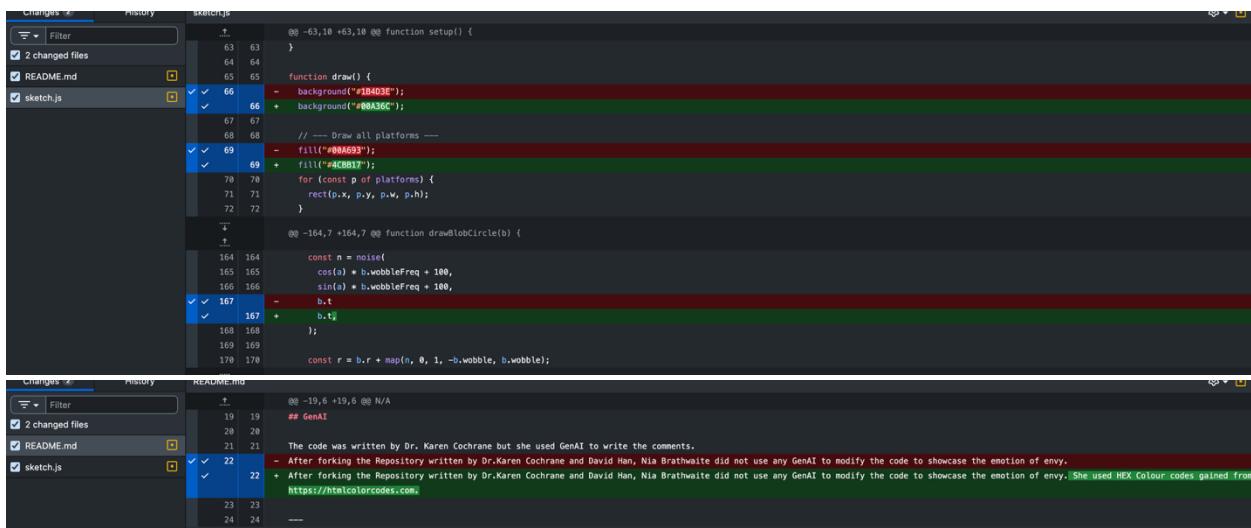

## Side Quests and A4 (Individual Work)

In this Side Quest, I changed the colours of the background, blob and platform tiles to match the selected emotion of envy. I gained these hex colour codes from HTML Color Codes.

### GenAI Documentation

No GenAI was used.

## Appendix

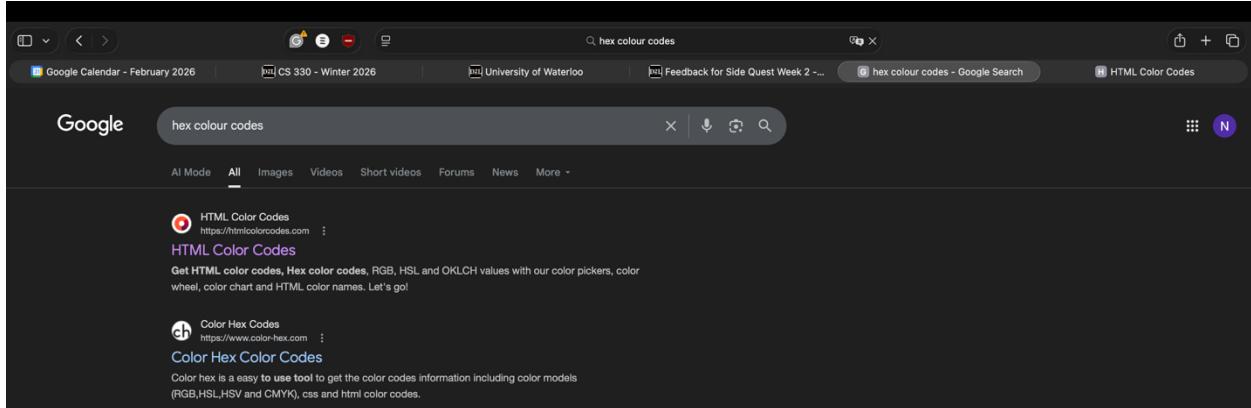

The screenshot shows the GitHub Changes interface with two files modified:

- sketch.js**: Lines 66 and 69 were changed from background="#1B403E" to background="#00A36C". Lines 69 and 167 were changed from fill="#00A36C" to fill="#4CBB17".
- README.md**: Lines 22 and 23 were added, indicating the use of GenAI to write the comments.

	Jade	00A36C	0,163,108	160,100,32
	Kelly Green	4CBB17	76,187,23	101,78,41
	Lime Green	32CD32	50,205,50	120,61,50

The screenshot shows a Google search results page for "hex colour codes". The top result is "HTML Color Codes" from <https://htmlcolorcodes.com>, which provides hex, RGB, HSL, and CMYK color codes. The second result is "Color Hex Codes" from <https://www.color-hex.com>, which is described as a tool to get color codes information including color models (RGB, HSL, HSV and CMYK), CSS and HTML color codes.

Colour Codes gained from:

HTML Color Codes. 2026. HTML Color Codes: Color Names. Retrieved from:
